

What Class of Animal Am I?

Each student gets a slip with one of these characteristics then, based on the animal or its characteristics, they sort themselves into classes: "mammals," "birds," "reptiles," "amphibians," and "arthropods" (insects, spiders, etc.); [FYI, "arthropods" is actually a phylum, not a class, but we don't care today, do we?]. There might be enough slips for two rounds or more.

I am a penguin.

I am a whale

I am a bat.

I am a dolphin

I have fur.

I spin webs

I have an exoskeleton.

I am a salamander

I have feathers.
